SUMMARY

---

Software Developer with 3 years of professional experience specializing in React.js, React Native, and Next.js. Experienced in building scalable, responsive applications and delivering high-quality user experiences across web and mobile platforms.

EXPERIENCE

---

**MySquegg**

Software Developer

05/2023 – Present  
Kathmandu, Nepal

Worked on a health-tech mobile application enabling clinicians to monitor patient rehabilitation through grip-strength assessments and therapy programs. Developed scalable UI components using React Native, optimized data handling with Redux, and implemented biometric authentication to enhance security and user experience.

- Contributed to production-level healthcare applications used by clinicians and patients.
- Implemented REST APIs to connect the application to the backend services.
- Developed reusable UI components that improved development speed and consistency.
- Collaborated with cross-functional teams to ensure timely delivery of project milestones.
- Debugged and resolved application issues to improve user experience.
- Implemented tailored sign-up flows for clinicians, creating a streamlined experience with clinician-specific dashboards and data capture.
- Enhanced assessment and activity flows, including grip and pinch assessments, force profile charts, and activity sessions, improving usability and accuracy for patients.
- Contributed to SQUEGG Admin Portal features, including clinic, therapist, and patient management workflows, with advanced data operations like search, sorting, and validation logic.
- Optimized global state management using Redux, improving application stability and performance.
- Implemented biometric authentication (Face ID / fingerprint) to enhance security and improve user login experience.
- Implemented pagination and efficient data handling for large datasets.
- Developed file export and report sharing functionality for users.

EDUCATION

---

**BSc (hons) in Computer Science**

University of Wolverhampton

04/2021 – 04/2023  
Kathmandu, Nepal

**Commerce**

Kashi Noble Academy

2018 – 2019  
Bhairahawa, Nepal

SKILLS

---

React | TypeScript | React Native | REST API | Git & Github | Next.JS | Jira | JavaScript

STRENGTHS

---

Problem-solving skills

Solved complex coding problems using React Native resulting in faster application performance.

Team player

Collaborated with cross-functional teams to develop and deliver high-quality products.

Attention to detail

Ensured code quality and accuracy through rigorous testing and review processes.

PROJECTS

---

Healthcare Marketplace Platform (Full-Stack Web Application)

05/2026 – 06/2026

Developed a full-stack healthcare marketplace web application connecting clients with verified allied health practitioners through secure authentication, role-based access control, appointment booking, and real-time messaging. Built scalable REST APIs, admin verification workflows, practitioner compliance management, and integrated real-time chat with SOCKET.IO Designed a responsive, production-ready React.js frontend with Node.js, Express.js, MongoDB Atlas, and modern UI/UX best practices.

- Developed a scalable full-stack healthcare marketplace platform using React.js, Node.js, Express.js, and MongoDB Atlas, implementing secure JWT authentication with Client, Practitioner, and Admin role-based access control.
- Designed and integrated RESTful APIs for user authentication, practitioner onboarding, profile management, admin verification, appointment booking, and dynamic marketplace data with complete CRUD functionality.
- Built a responsive, API-driven frontend with React Router, reusable Material UI components, protected routes, dynamic routing, and seamless state management to deliver an intuitive user experience across devices.
- Implemented real-time one-to-one messaging using Socket.IO , featuring instant message delivery, online/offline user presence, recent conversations, and secure communication between clients and practitioners.
- Engineered a production-oriented application architecture with modular components, scalable database schemas, secure middleware, and Git-based version control, emphasizing maintainability, performance, and extensibility.

Personal Portfolio Site

06/2025 – 07/2025

Developed a responsive and interactive personal portfolio website to showcase my resume, work experience, and projects.

- Designed and implemented the user interface using React and Material-UI for a modern, responsive layout.
- Integrated sections to display projects, resume, and work experience, including live links to apps like SQUEGG.
- Optimized site performance and user experience for desktop and mobile devices, ensuring smooth navigation and accessibility.

### **Food App**

05/2023 – 06/2023

- Implemented a responsive and intuitive UI, ensuring smooth navigation across different devices.
- Implemented Redux for state management, ensuring efficient handling of user data and app state.
- Ensured cross-platform compatibility, making the app smooth on both Android and iOS.

### **Shutter Scope (A camera rental System)**

11/2022 – 04/2023

Shutter scope is an online based web application with a moto to solve camera gear and equipment-based problems. Its goal is to provide an online platform for renting camera-based equipment.

- Designed wireframes, prototypes, and high-fidelity designs to communicate design concepts and specifications to stakeholders.
- Conducted usability testing and iterated on designs to ensure the best user experience possible.
- Built responsive and user-friendly interfaces for the ShutterScope web application using React.js.
- Developed dynamic features such as search and filter options for the camera rental.

### **Tour Management System**

2022 – 06/2022

A Portal for a Travel and Tours Company that has a variety of tour details and packages on their website. Visitors can submit forms on the various Tour Pages to request tour packages. The Travel and Tours Company can view the Tour request submissions Resources.

- Designing and developing the user interface.
- Created wireframes, prototypes, and high-fidelity designs in Figma, using user research and testing to improve usability and engagement.
- Developing responsive layouts and implementing designs.
- Built the user interfaces using HTML, CSS, and JavaScrip.
